Bridges to Markets

DRAWbridge **Brava** **for CAD Add-in**

Datasheet May 2020 – Version 6.6.0

Review and annotate CAD drawings.

Annotate CAD Drawings

The DRAWbridge suite of products integrates CAD drawings/3D models seamlessly with Documentum repositories.

The DRAWbridge Brava for CAD Add-in collects and hands over all its linked files to OpenText's Brava for CAD viewer. This way Brava displays all relevant documents to the user for reviewing, commenting and comparing electronic drawings.

DRAWbridge manages drawings with their linked files such as xRefs, images and any other format document as one entity within the Documentum ECM environment. The DRAWbridge Add-in collects these files and hands them over to Brava when it is launched.

The combination of Brava for CAD and the DRAWbridge Brava for CAD Add-in lets Documentum users review and annotate electronic drawings without the need to purchase expensive CAD-system licenses.

As an option, BLOCKbridge can automatically update the title block when they start reviewing it, securing the user with the most current information in their drawings.

Business Benefits

DRAWbridge Brava for CAD Add-in delivers the following benefits to your business:

- » Reduce design and construction errors
- » Improve collaboration between engineering disciplines internally as well as with external parties

- » Save time and effort in producing drawings in various formats for secure and reliable distribution and exchange

Technical Features

DRAWbridge Brava for CAD Add-in functionality includes:

- » Management of the reference files, xRefs and links related to CAD drawings
- » Management of hybrid raster/vector drawings
- » Support for title block synchronisation before reviewing the document (option)
- » Maintenance of links across drawing versions
- » Handling of nested reference files, xRefs and links
- » Management of links from the master drawing to any other document format

The DRAWbridge product suite supports the following systems:

- » Documentum Webtop, D2, Asset Operations and Capital Projects
- » AutoCAD from Autodesk
- » MicroStation from Bentley Systems

DRAWbridge Brava for CAD Add-in is a part of the DRAWbridge Suite.
