DRAWbridge

Content Bridge

Add-in

Datasheet May 2020 – Version 6.6.4

Migration support for CAD Data.

Migrate CAD Data

The DRAWbridge suite of products integrates CAD drawings and 3D models seamlessly with Documentum repositories.

DRAWbridge for Content Bridge Add-in is developed to support the migration/bulk import of drawings/models when using OpenText Content Bridge solution.

After bulk loading the CAD models into Documentum, they need to have their attached files (xRefs, references, linked components) linked in order for the user to handle them as one entity.

The DRAWbridge for Content Bridge Add-in, works in conjunction with our BULKbridge product, which creates the relationships between the master and its linked files.

The DRAWbridge for Content Bridge Add-in automatically creates the relationships between an electronic model and its linked files, after they have been (bulk-) loaded into a Documentum repository using OpenText Content Bridge.

Business Benefits

DRAWbridge for Content Bridge Add-in delivers the following benefits to your business:

- ▶ Creates links between electronic drawings/models and their linked files in an automated fashion, after they have been downloaded into the Docbase
- ▶ Supports complex linking, such as nested files
- ▶ Replaces the error-prone manual import of drawings/models and their linked files, reducing re-work cost and effort significantly

Technical Features

DRAWbridge for Content Bridge Add-in functionality includes:

- ▶ Creation of the links between drawings/models and their linked files in the Documentum repository
- ▶ Supports complex and nested links
- ▶ Whereby the format of linked files is arbitrary (drawings, raster images, Office documents, PDFs etc.)
- ▶ Runs in batch as a post-process

btmSOFTWARE

Bridges to Markets

The DRAWbridge product suite supports the following systems:

- » Documentum Webtop/D2, Asset operations and Capital Projects
- » AutoCAD and Revit from Autodesk
- » MicroStation from Bentley Systems

DRAWbridge for Content Bridge Add-in is a part of the DRAWbridge Suite.
