Bridges to Markets

INDEXbridge

Datasheet, Version 6.6.0 May 2020

*Makes the contents of CAD drawings
searchable.*

MAKES CAD DRAWINGS SEARCHABLE

INDEXbridge helps the CAD users finding their drawings and 3D models in a faster, more effective and intuitive way.

CAD users tend to work on a large amount of drawings at the same time within an engineering project. They reduce their design time significantly by re-using components, which they and their colleagues have created in the past.

The standard search methods given in Documentum already are a big help to the user. However, searching for components/content within the drawing or model itself is not a part of it. This is where INDEXbridge comes to play.

With INDEXbridge, users can search for text within CAD information stored in Documentum. So, if they are looking for a pump or valve, they just need to type in the equipment number and INDEXbridge will return the list of the drawings and models containing the requested component.

INDEXbridge is seamlessly integrated with the Document search engine and therefore, supports its comprehensive capabilities, allowing the users to perform complex searches, such as looking for all the published drawings containing specific equipment and belonging to a specific project.

Business Benefits

INDEXbridge delivers the following benefits to your business:

- ▶ Reduce time to search for existing components in CAD information and as a result reduce design and construction errors
- ▶ Save time and effort in producing drawings for secure and reliable distribution and exchange
- ▶ INDEXbridge is easily installed and configured saving investment in services

Technical Features

INDEXbridge functionality includes:

- ▶ Searching text contained in CAD drawings using Documentum's Full Text Search Engine
- ▶ Connecting to an unlimited amount of Documentum repositories for indexed search
- ▶ Complex and combined search requests
- ▶ It runs as an unattended process with load-balancing capabilities
- ▶ Supporting Webtop, D2, Asset Operations and Capital Projects
